

# Computer Software

**Class Five**

**Lab 6**

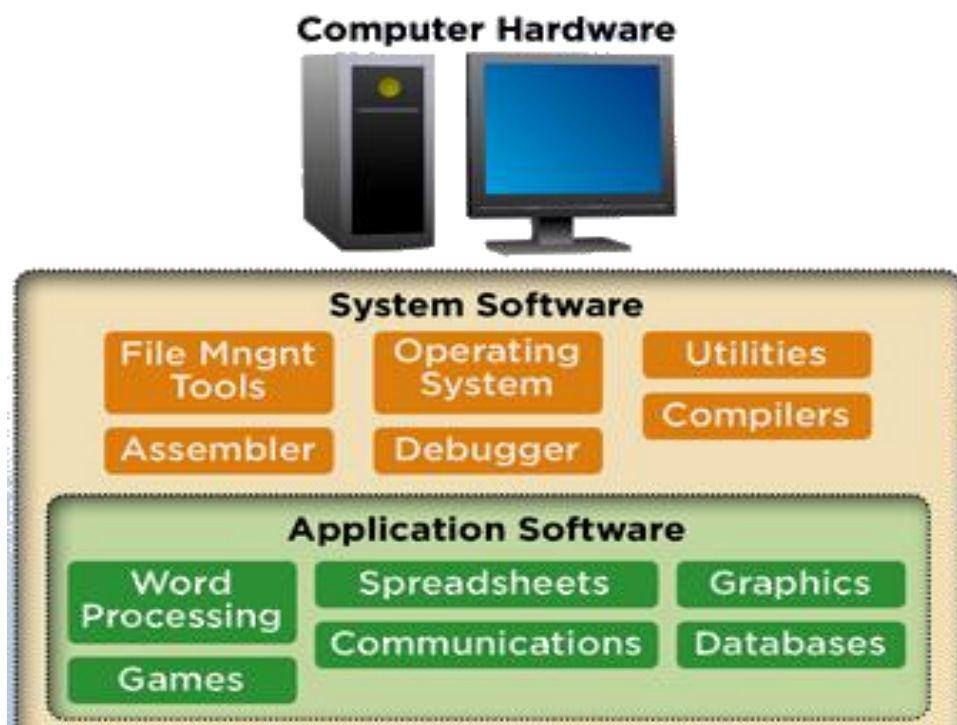

## Lab Objectives:

- Skype
- Gmail
- LinkedIn
- Facebook
- Twitter

## Software

Computer software, or simply software, is a collection of data or computer instructions that tell the computer how to work.

## System Software

It is a base for application software which is responsible for managing hardware.

In other words we can say that system software is a inter mediator between user and hardware. system software is also known as Operating System  
Example - MS-Windows, UNIX, Linux, Sun Solaris

## Application Software

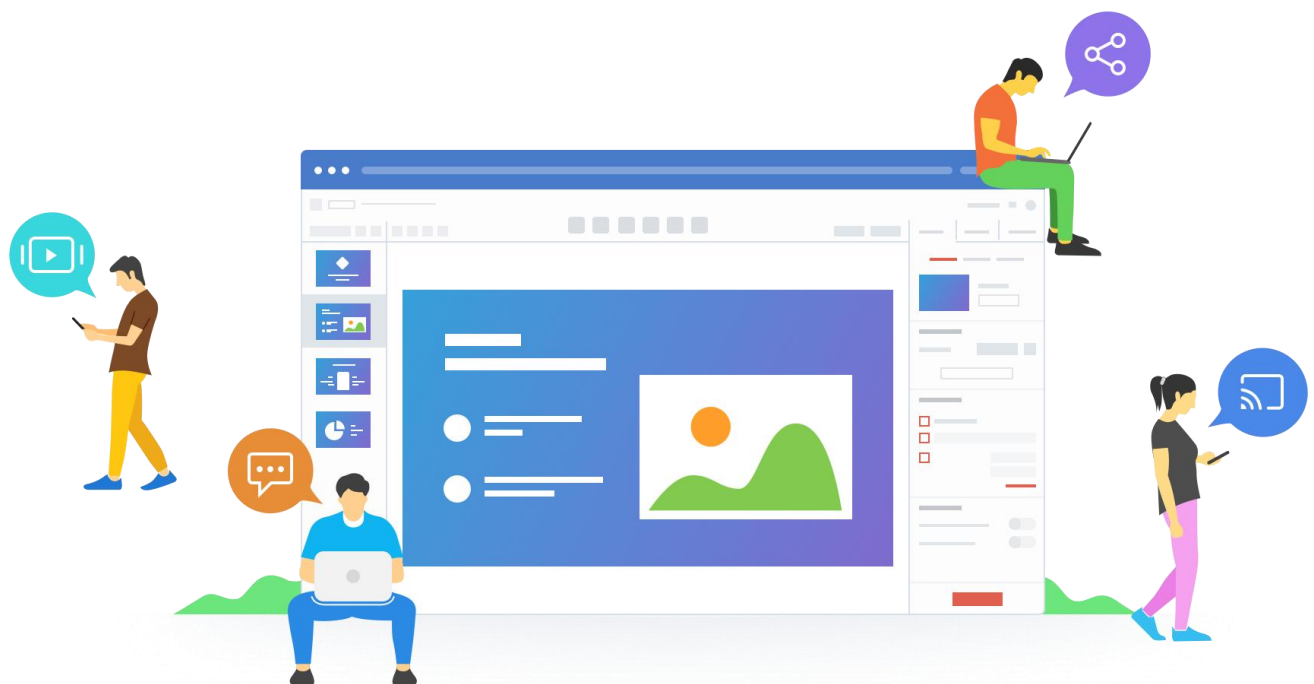

simply applications, which are often called productivity programs or end-user programs because they enable the user to complete tasks, such as creating documents, spreadsheets, databases and publications, doing online research,

sending email, designing graphics, running businesses, and even playing games! Application software is specific to the task it is designed for and can be as simple as a calculator application or as complex as a word processing application.

## Online vs Offline Software

Some software needs data connection to play whereas you can use lots of software without having data.

## Most Popular Online Software

- ✓ Skype
- ✓ Gmail
- ✓ LinkedIn
- ✓ Facebook
- ✓ Twitter

### Skype

Skype is a telecommunications application that specializes in providing video chat and voice calls between computers, tablets, mobile devices, and smart watches via the Internet.

## GMAIL

Gmail is a free email service developed by Google. User can send , receive email using GMAIL. Not only mailing service but GMAIL provides lots of extra facilities like Google Drive, Calender, photos, word, spread sheet etc also.
