

MS Access

Class VIII
lab 25

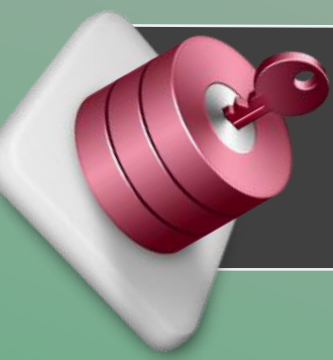

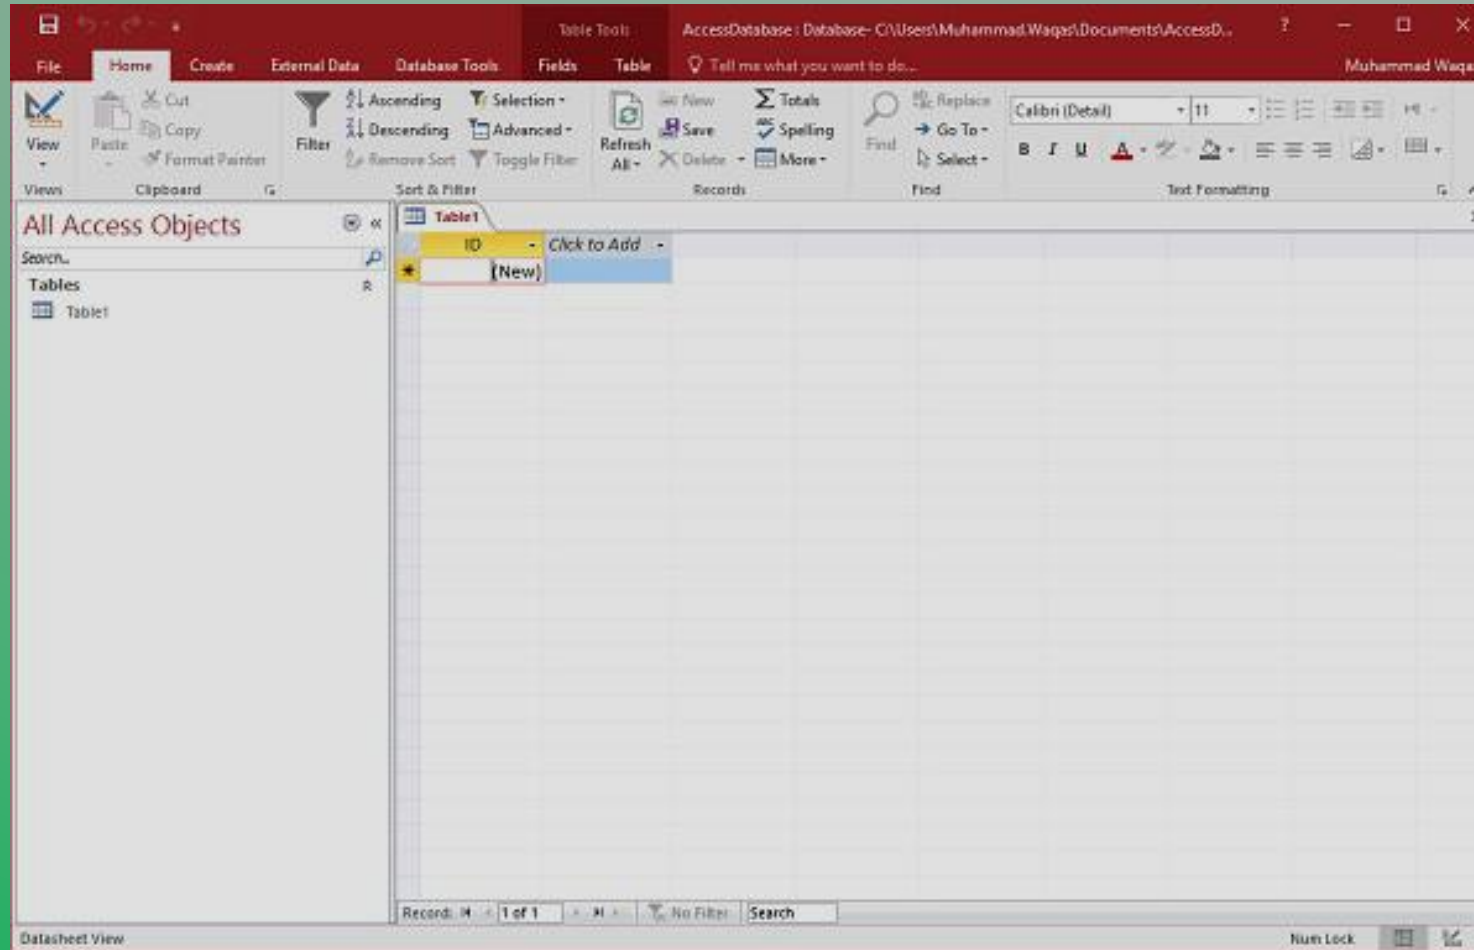

Create Tables

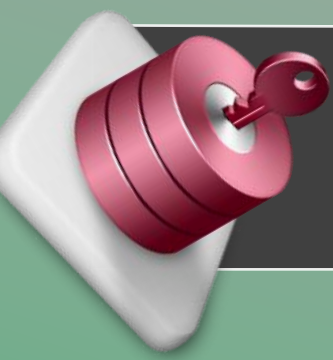

When you create a database, you store your data in tables. Because other database objects depend so heavily on tables

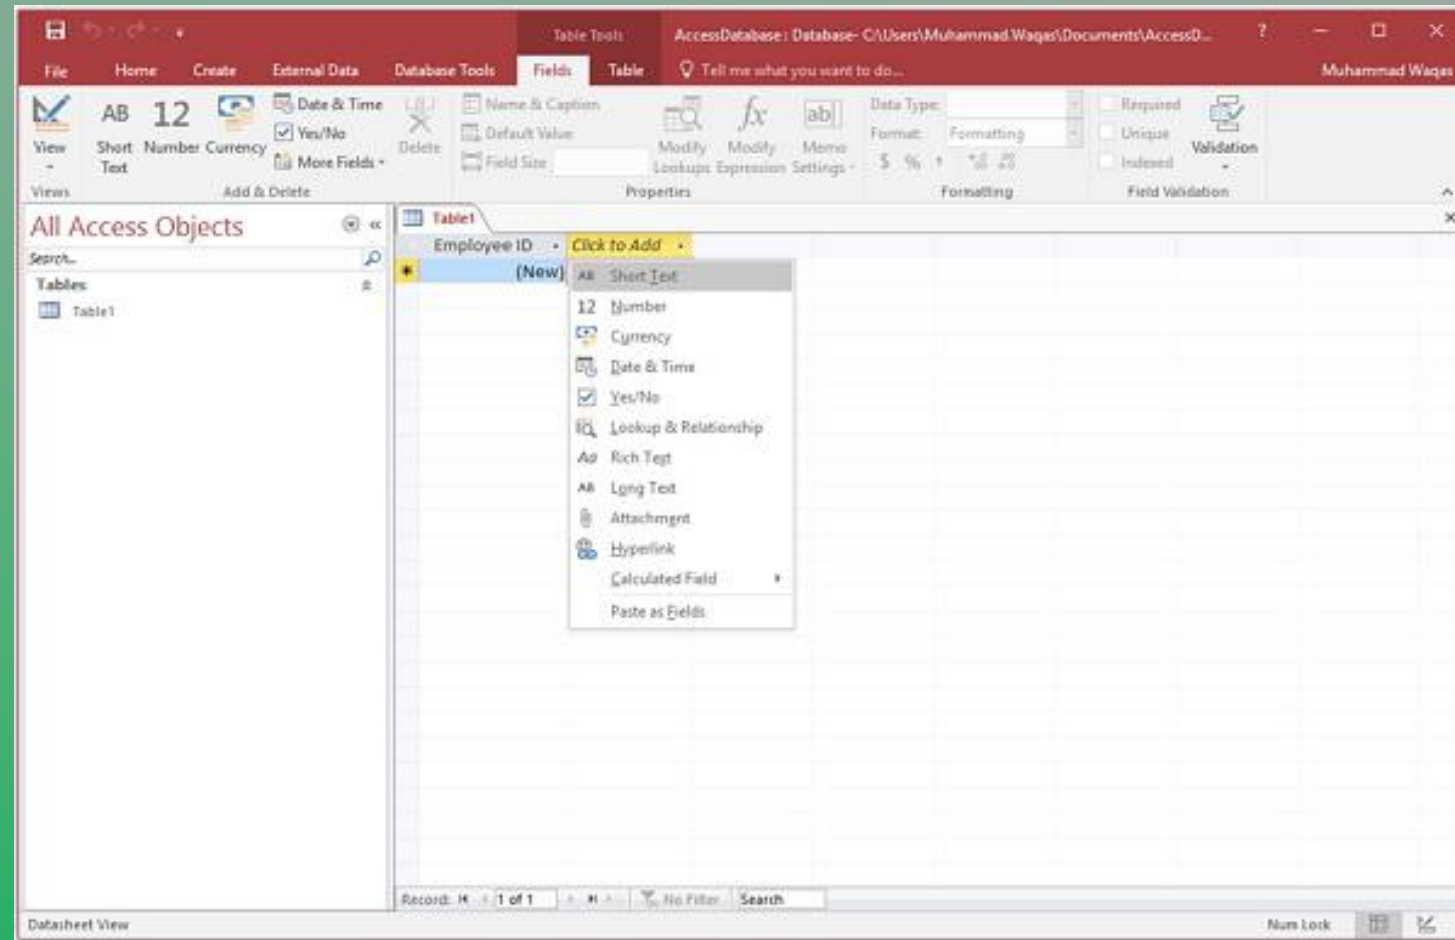

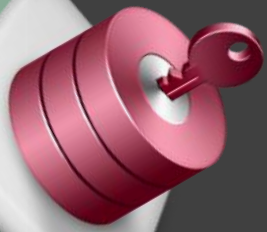

Open Blank Database

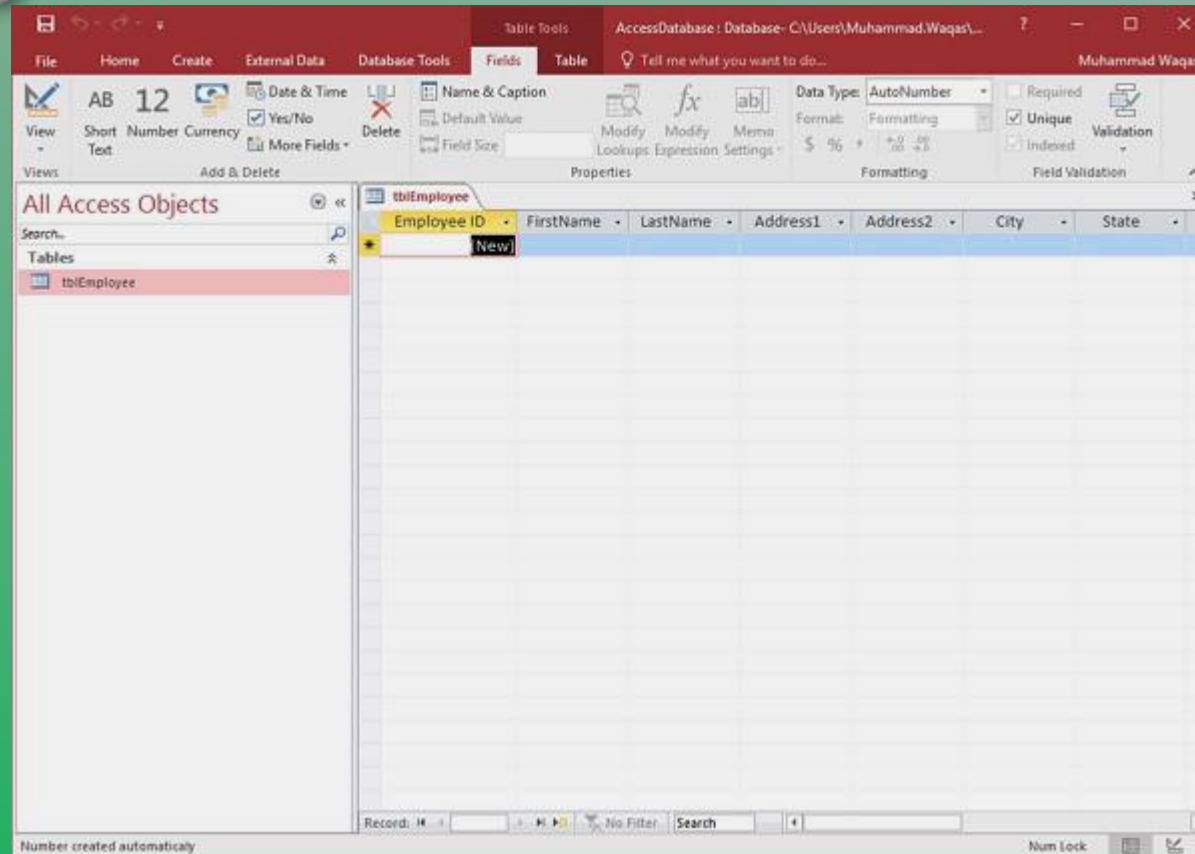

Add More Fields

Prefix Stands for Table

Enter the name of your table in the Table Name field. click Ok and you will see your table in the navigation pane

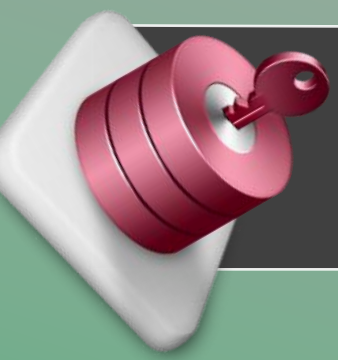

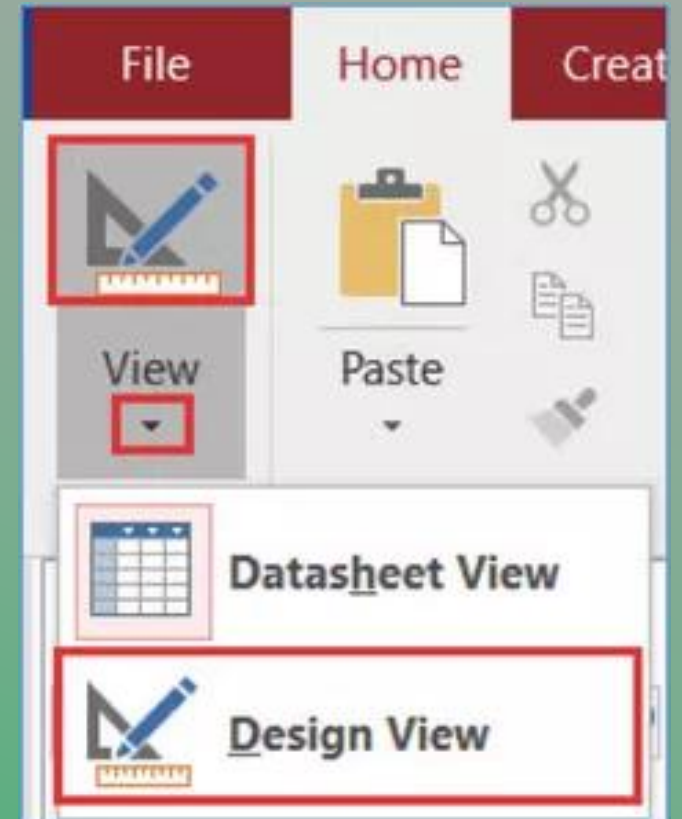

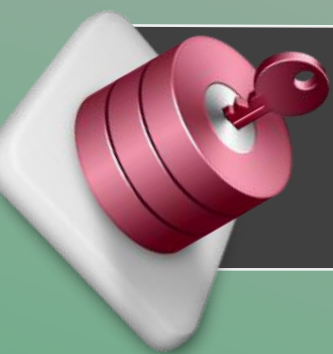

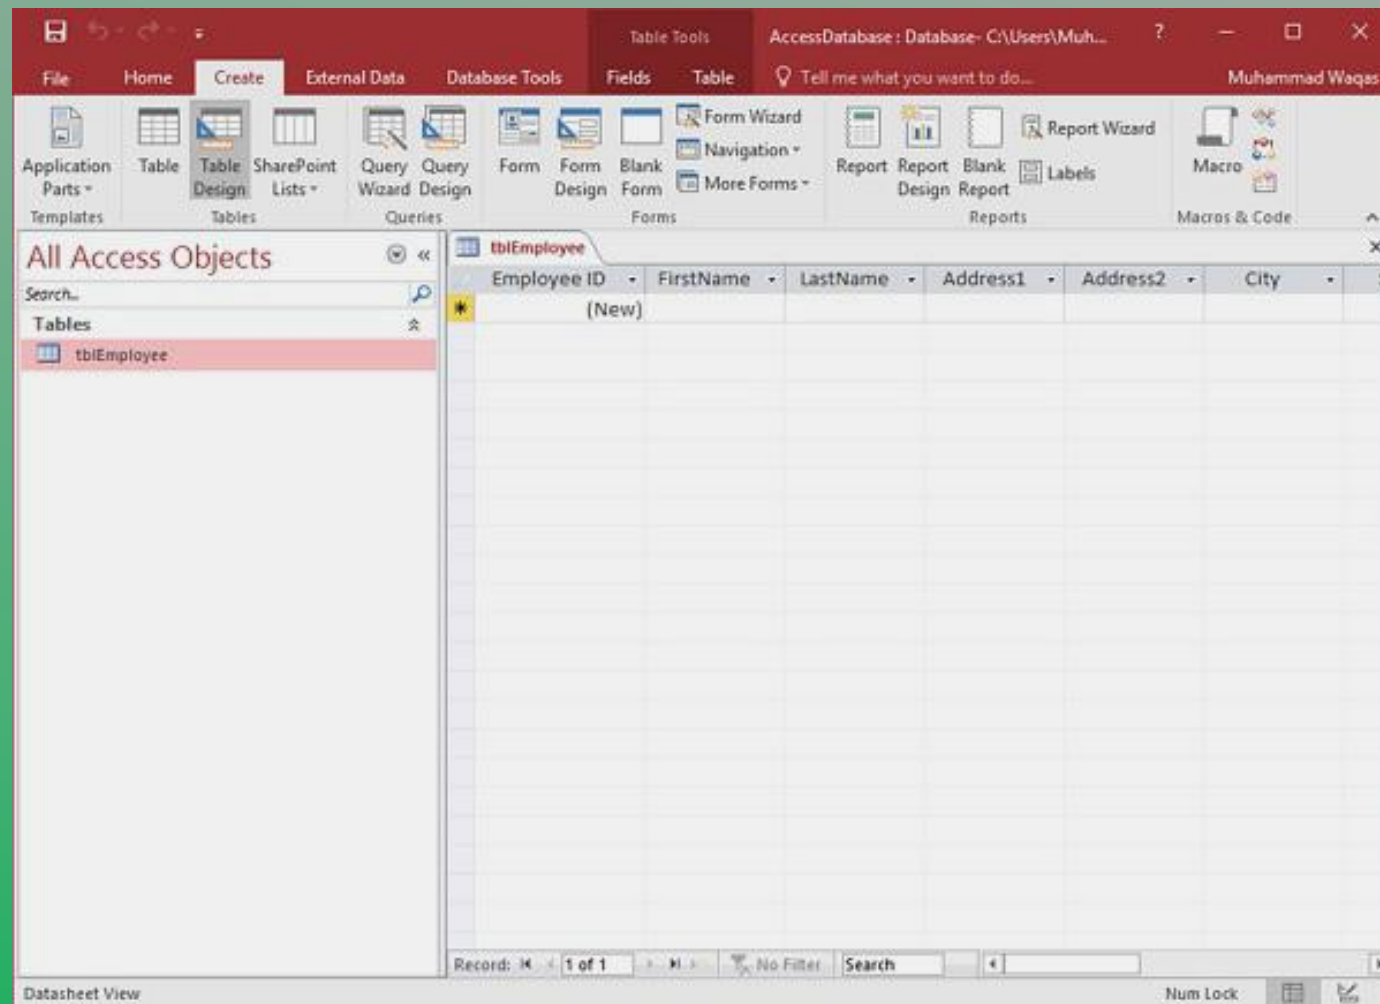

Table Design View

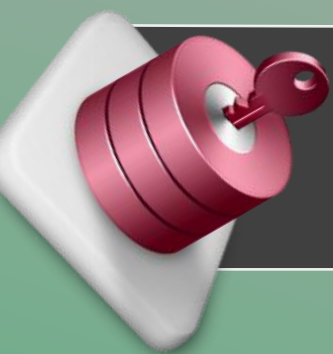

Table design view is used to design a table; if new table is inserted then design view is used to add the required fields in it
