structure

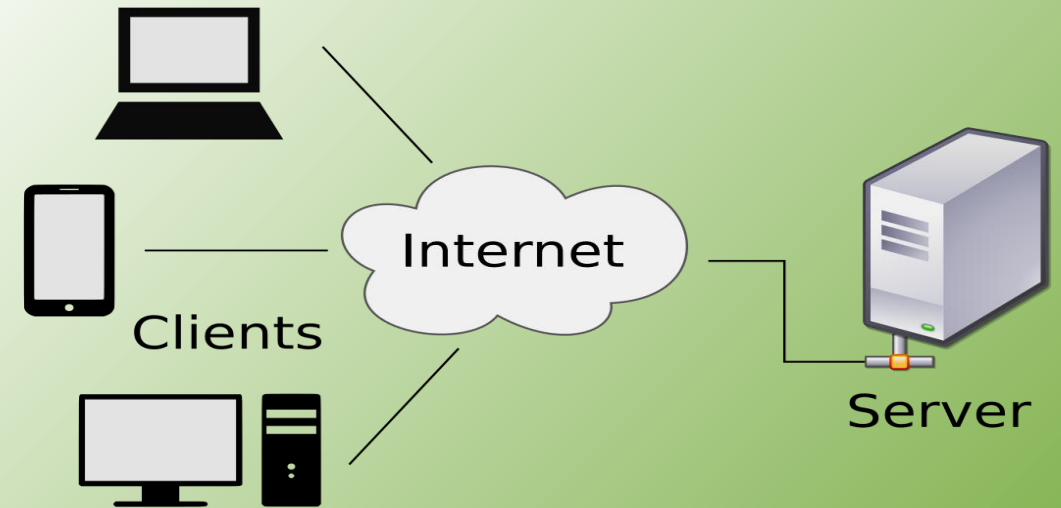

## Client-Server Model

# Client

computer hardware device or software that accesses a service made available by a server

# Server

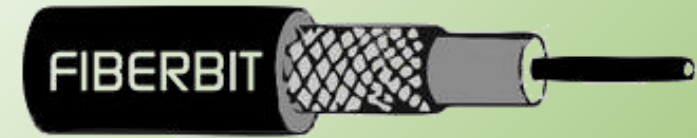

A host is a computer, connected to other computers for which it provides data or services over a network

# IP Address

Media refers to the communication channels used to interconnect nodes on a computer network

Coaxial cable

Shielded Twisted-pair cable

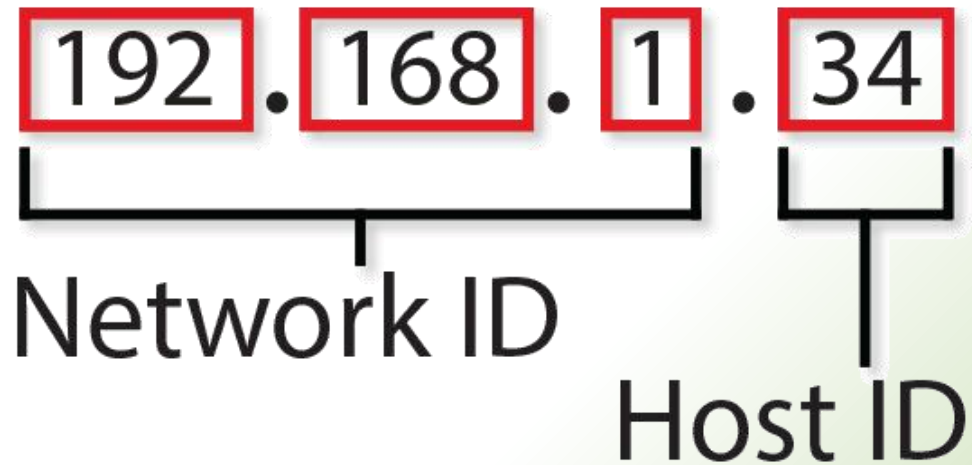

Fiber-optic cable

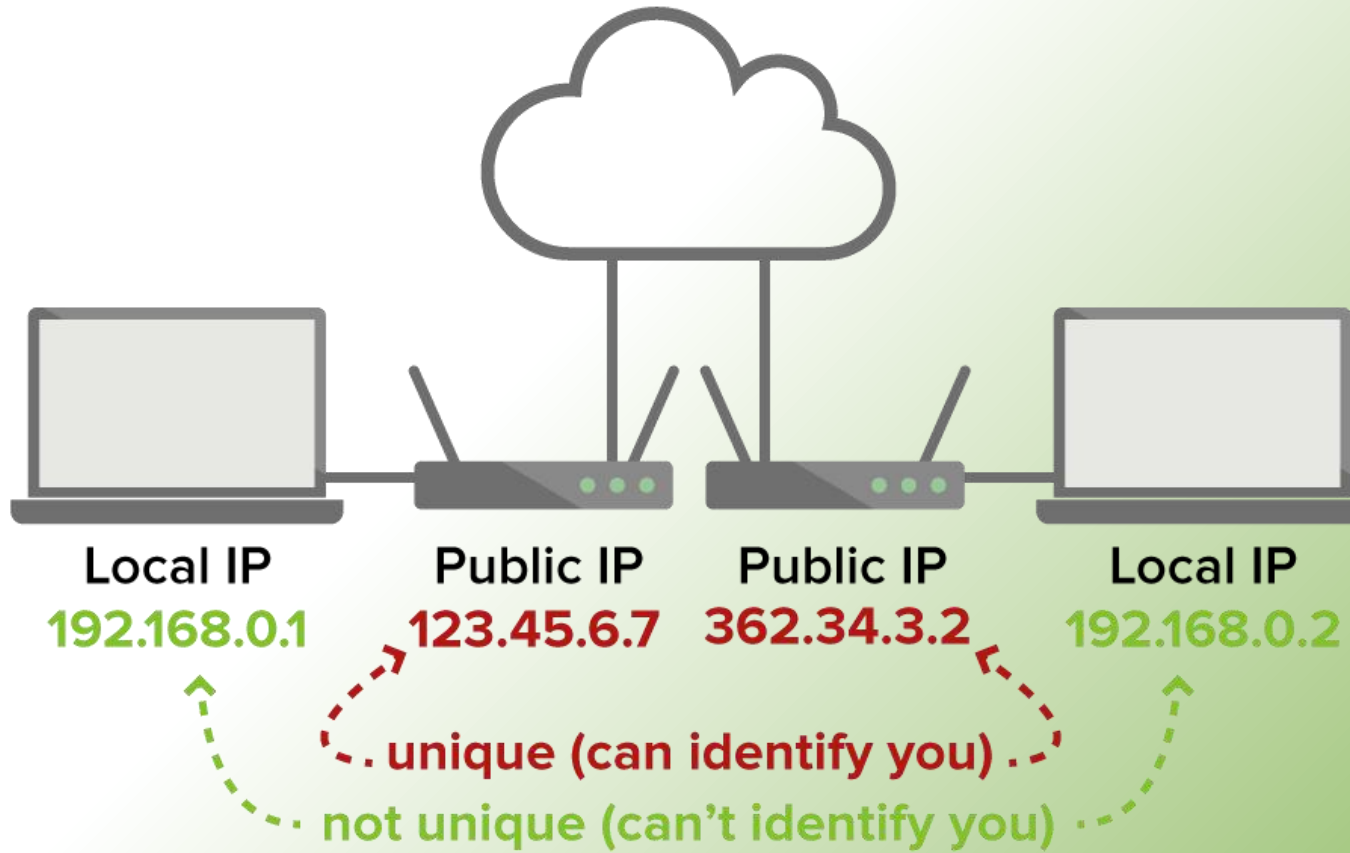

# IP Address

An Internet Protocol address is a numerical label assigned to each device connected to a computer network

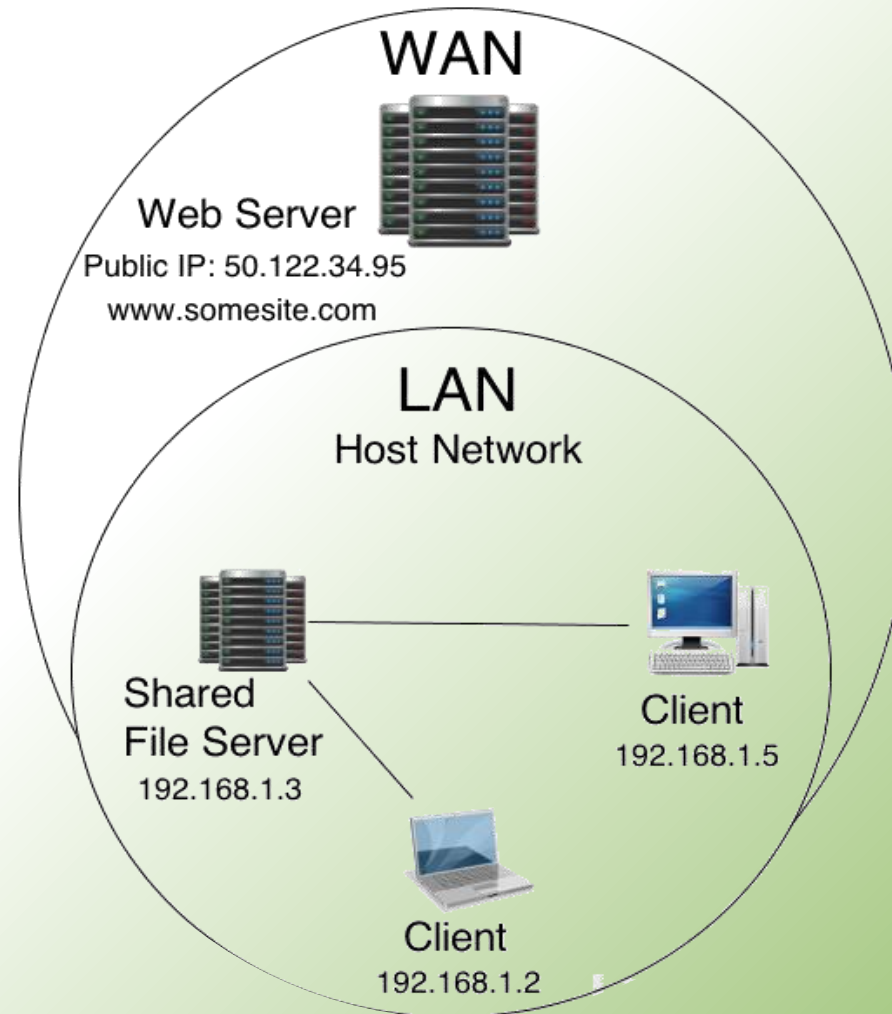

# Public vs Private IP

# Accessing a Server

Thank  
you!
