Lab Tutorial

Class 8

Lab 20: String Manipulation

1. Question-Answer (use python idle)

1. Print this:
   I love my 'country' Bangladesh

2. Check the 4th index of the following word 'Paratha'

3. Take a variable named drink and assign a word named 'cold coffee'
   finally print → I love to drink cold coffee

4. Assign two strings 'You' and 'Tube' into two variables. Join two
   strings and print 'YouTube'

5. Use join function and print 'Mango-Apple-Banana'

6. Take your school name as a string and make every character capital.
   Example:
    variable = 'Achia Bari High School'
   result → ACHIA BARI HIGH SCHOOL

7. Turn every first character of the word into capital letter.
   Example:
   Variable = "achia bari high school"
   Result → 'Achia Bari High School'

8. Find the length of the word 'Dhaka'

9. Replace 'H' by 'T'
   Example:
   Variable = 'Hamim Hasan'
   Print → Tamim Tasan

10. Count the number of 'a' from the sentence 'aaj ami abar aam khabo'
